EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel Burns on Friday February 23, 2007 at 3 p.m.

See the Examiner-initiated Interview Summary sheet for a detailed explanation of the substance of the interview.

The application has been amended as follows (additions to each claim are underlined and deletions to each claim have a single strikethrough line or are surrounded by double brackets):

Claim 1 (starting from line 13):

original type; [[and]]

creating a raster representation of the transformed graphical element based on the processing[[.]]; and

displaying the raster representation on a display device or printing the raster representation on a printing device.

Claim 22 (only lines 1 and 2):

~~A computer program product, tangibly stored on a tangible computer-readable medium,~~ A tangible computer-readable medium having stored thereon a computer program product for processing graphical elements, the product comprising

REASONS FOR ALLOWANCE

Claims 1-28 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not describe processing a transformed graphical element using stored information about the transformed graphical element's original type, wherein a rule applied when processing untransformed graphical elements having an original type differs from a corresponding rule applied when processing untransformed elements having a transformed type, the transformed graphical element being processed using the rule applied when processing untransformed graphical elements having the original type.

The closest prior art (Yoshino et al. US 6,141,462) describes a system for processing and then trapping graphical objects. The system takes as input a set of image parts from a Postscript file. It first creates an adjoining relationship list, which describes each individual part's spatial adjacency to any adjoining parts, then it evaluates the color of each image part and determines if any of the image parts can be grouped together and treated as one combined image part. If any of the image parts can be grouped together then the system groups the parts together. Finally, the system traps all image parts against surrounding image parts, which includes trapping the grouped part against any surrounding image parts. The trapping process uses the original adjoining relationship list to determine which surrounding image parts are spatially adjacent to the grouped part (columns 5 and 6).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dan Washburn whose telephone number is (571) 272-5551. The examiner can normally be reached on Monday through Friday 8:30 a.m. to 5:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ulka Chauhan can be reached on (571) 272-7782. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
